Activity Book

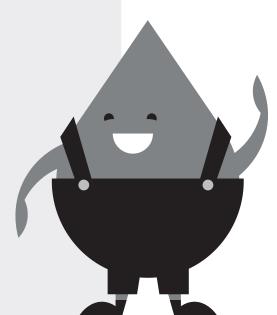

My name is Mr. Oil Drop, here to tell you about recycling used oil products.

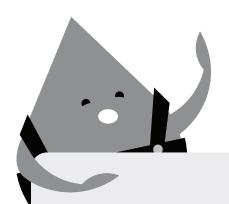

To make sure our planet stays clean, we all have to be responsible.

If you reduce, reuse and recycle as much as you can, you can make the world a healthy place today and for the future.

So, go for it! Protect our planet today and everyday.

Did you know...

Used oil can be cleaned and reused to power big machines or even heat buildings. Nothing goes to waste!

Used motor oil is one of the only non-renewable resources that can be reused over and over again, infinite times.

Even though kids don't change oil, you can remind adults to recycle it—and that's a BIG help for the planet.

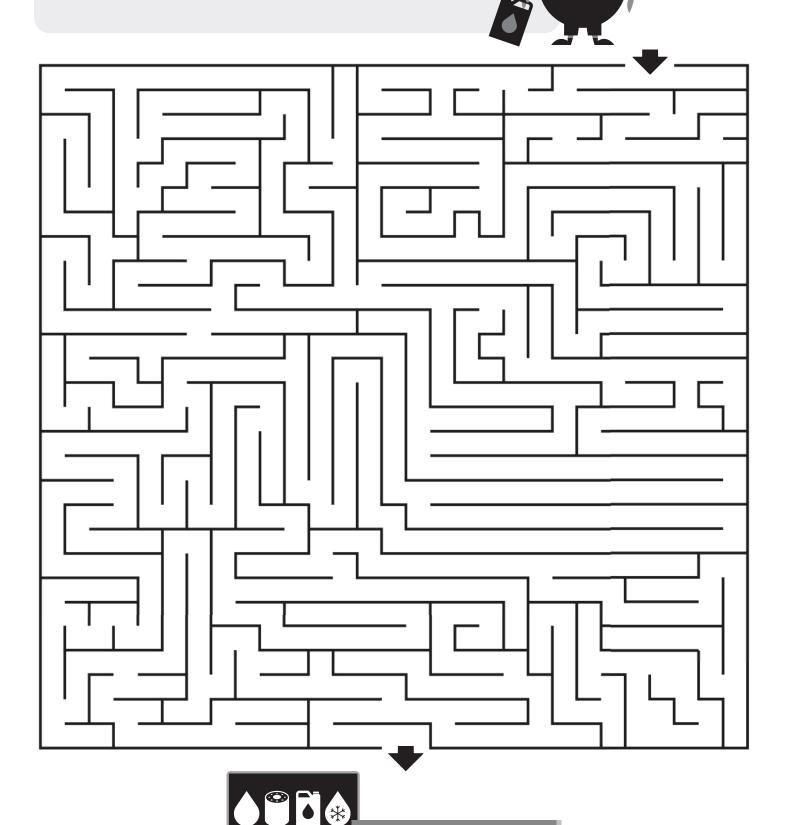

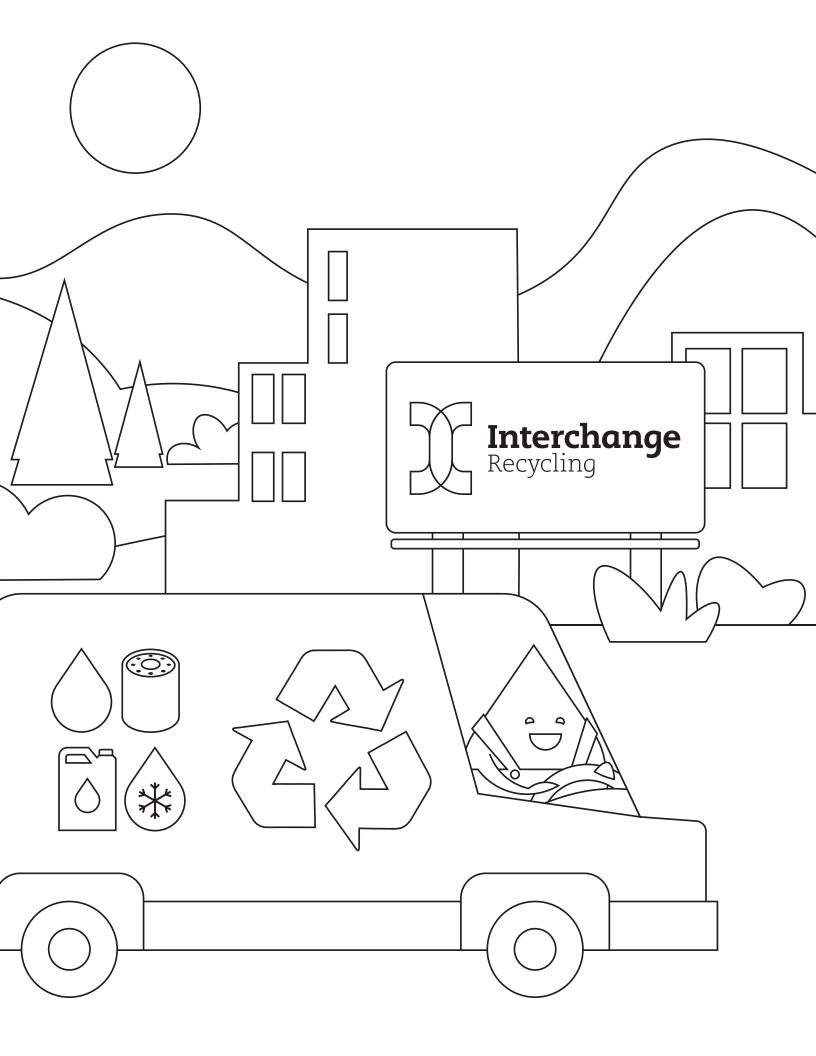

Every time oil is recycled, it helps protect our forests, oceans, and the creatures that live there.

By recycling used oil, we help maintain the quality of rivers, lakes, and oceans—supporting the fish, birds, and animals that rely on these ecosystems.

Help Mr. Oil Drop get to the Public Recycling Centre!

Across

- 4 slippery brown liquid that comes from the ground
- 6 small net that catches the dirty stuff in the oil
- 8 turn old items into new ones
- **9** the opposite of old
- 10 steps taken to protect yourself
- 12 time that hasn't happened yet

Down

- 1 a different word for engine
- 2 if you're not dirty, you are _____
- 3 long road that connects cities
- 5 clear liquid you drink every day
- 7 the planet we live on
- 11 big vehicle built to carry things

How can you help?

If your parents change their own oil, remind them nicely to bring their used oil to a collection site—and make sure that no oil is spilled! Make sure they bring their oil filters and containers for recycling too.
