

Round Up Grants

Grant funding is available to Local Governments, First Nations Communities and community recycling organizations for their planning, coordination, and execution of Community Collection or “Round-up” events. Interchange Recycling will provide \$3,000 per approved event along with event marketing support including creative assets, event signage and social media posts.

Please be aware that when submitting an application priority will be given to those communities that do not have reasonable and free consumer access to a permanent Return Collection Facility. We continue to provide a volume based financial incentive to the registered collection company that is selected by the event organizers to collect and transport the material to an Interchange Recycling-registered processing facility. To find a list of the registered collectors that serve your area of the province please visit our [website](#).

If you are interested in applying for a Round-up Grant, please send an e-mail request to rcf@interchangerecycling.com and include the following information:

- the lead organization for the event
- the location and date for the planned event(s),
- which other stewardship associations will be participating.

Requests for marketing support must be submitted at least two weeks prior to the event dates and before we can issue payment, we need to receive following outcome metrics in writing:

- Used Oil (litres)
- Used AF (litres)
- Filters (kgs)
- Containers (bags)
- Vehicle Count
- # of people attended
